Re: Docket No. 12504

DEPT. OF TRANSPORTATION  
02 AUG 28 PM 3:14

1. The following are recommend additions to the proposed Security Considerations for the Flightdeck on Foreign Operated Transport Category Airplanes.

A. §129.28

- I. Include detailed emergency exit procedures for the pilots who are locked behind the reinforced doors during an accident or any other emergencies such as loss of ventilation or medical emergencies.
- II. This proposed rule is very detailed on the effectiveness to keep unauthorized persons from entering the flight deck but neglects to cover how authorized persons may get out from behind the reinforced doors if normal situations are deviated from.
- III. Should have two-person integrity (TPI) on all internal locking devices to assure proper security procedures are followed.

2. I greatly appreciate the opportunity to participate in the rule making process.

Sincerely,

Jaclyn Hicks
